ABSTRACT

This paper presents the results of a follow-up study of students who completed a Johnson County Community College (JCCC) (Kansas) career program. Of 699 students on a list of completers, 465 returned surveys for an adjusted response rate of 67%. Of 176 potential respondents who were employers of students, 124 returned surveys for an adjusted response rate of 71%. The survey found that: (1) the average annual salary reported by respondents employed full-time in a job related to their career program is at a high of \$34,174 for the class of 2000; (2) male respondents who were employed full-time in a job related to their career program continued to out-earn females -- for the class of 2000, the overall salary average reported by males was 5% higher than that reported by females; (3) 83% of respondents were satisfied with their current job; (4) 74% of respondents working in a related job had not been employed in their current job prior to attending JCCC; (5) more than 70% of respondents reported improvement in their tolerance for people and ideas, decision making skills, time management skills, knowledge of the arts and sciences, and in clarifying their personal values and goals; and (6) the majority of employers were satisfied with the preparation of the career program completer in their employ. INTRODUCTION

Each year the Office of Institutional Research at Johnson County Community College, as a major component of the college's overall plan to assess institutional effectiveness, conducts follow-up studies of students who completed a JCCC career program (or a co-op program through one of the Metropolitan Community Colleges) during the previous academic year, and of the employers of completers who are working in a job related to their course of study. Results of these studies provide valuable insights into the effectiveness of career programs. Findings also assist the college in planning to meet the individual needs of future students and the employment needs of business and industry.

Completer Survey Methodology

A list of 749 career program completers¹ was developed in the fall of 2000 by combining lists of students earning degrees and certificates with those leaving the program with marketable skills. Surveys and cover letters were mailed in November, with one follow-up mailing to nonrespondents in December. Efforts were made to contact remaining nonrespondents by telephone in January of 2001, and additional information secured through telephone contact with acquaintances of completers was utilized for a third mailing conducted in February. The assistance of career program administrators was enlisted throughout the spring semester to locate as many remaining nonrespondents as possible.

A total of 30 former students had no opportunity to respond due to obsolete addresses and/or telephone numbers, and 20 indicated our records were in error and they had not completed a career program during the previous academic year, reducing the list of potential respondents to 699. Of those, 465 completed surveys for an adjusted response rate of 67%.

The 167 completers of one of the short-term health occupations program certificate classes over the 1999-2000 academic year also were mailed a survey in November, with one follow-up mailing in December, 2000. Results for the 11 respondents to these mailings are included in this report.

Employer Survey Methodology

Respondents working in a job related to their community college program identified a total of 199 employers who were subsequently surveyed by mail. The initial mailing and one follow-up mailing in February resulted in 23 surveys returned by the postal service as undeliverable or containing a note indicating an inability to complete the survey (completer unknown, new hire,

ָר ב ת

¹ Note. The career program completer list excludes Burlington Northern employees and police academy graduates.

no longer employed there, or disclosure of requested data against company policy), leaving 176 potential respondents. Of those, 124 returned completed surveys for an adjusted response rate of 71%.

A summary of major findings of the study follows. Tables detailing results of the completer survey are located in Appendix A, and tabled results of the employer survey may be found in Appendix B. A list of tables is provided at the start of each appendix to facilitate location of specific data, and findings are presented by career program as often as possible to enhance the usefulness of results. Caution should be exercised when generalizing these data due to the relatively small number of respondents in some programs. Findings are not necessarily representative of either the number of students enrolled in each program or the salaries of all career program completers.

Comments or questions regarding this report or previous follow-up studies of career program completers may be directed to:

MAJOR FINDINGS

Utilization of Community College Preparation

- * Over 80% of respondents were employed in a job related to their community college career program, and another 12% were working in an unrelated job. Less than 2% of survey respondents were unemployed and looking for work; 4% were pursuing additional education, and the remainder were serving in the military or out of the labor force all together.
- * The average annual salary reported by respondents employed full-time in a related job has continued to increase incrementally over time to a high of \$34,174 for the class of 2000, up from \$33,259 for the class of 1999.
- * Although the gap is narrowing, male respondents who were employed full-time in a job related to their career program continued to out-earn females working full-time in related jobs. For the class of 2000, the overall average annual salary reported by males was 5% higher than that reported by females (\$35,110 vs. \$33,300). Females reported higher average earnings than males in only two career fields: electronics and emergency medical technology.
- * The majority of respondents working in a related job had **not** been employed in their current job prior to attending JCCC (74%), were working in their first full-time job in their chosen career field (55%), and had been employed in their current job for one year or less (60%).
- * Most respondents who were employed full-time in a related job were happy with their work. Eight out of ten respondents rated most aspects of their job as excellent or good, and 83% expressed satisfaction with their current job.

Community College Experiences

- * The median age of respondents (29.0 years), the median length of time enrolled in their career program (4 semesters), and the median number of credit hours completed (60 to 65) have remained essentially the same throughout the last decade. However, the percent who earned associate degrees decreased substantially, from 67% in 1991 to 56% in 2000. This decrease is primarily attributable to the popularity of the information technology certificate programs.
- * Three out of four respondents reported improvement in their self-confidence as a result of their community college experiences, and over 70% reported improvement in their tolerance for people and ideas, decision making skills, time management skills, knowledge of the arts and sciences, and in clarifying their personal values and goals.

Satisfaction With JCCC

- * The overwhelming majority of respondents were satisfied with JCCC. Fully 92% indicated JCCC was their first choice college to attend and, if starting now, over 92% would attend JCCC again. Fully 96% would recommend JCCC to friends, and 88% would encourage their own children to attend JCCC.
- * Over 91% of respondents expressed satisfaction with the college's facilities and equipment, and nine out of ten expressed satisfaction with the course content, quality of instruction, and the variety of courses. Approximately eight out of ten respondents also expressed satisfaction with the helpfulness and individual attention of the faculty, convenience of class scheduling, registration process, and usefulness and relevance of the coursework.

Current Educational Endeavors and Future Educational Plans

* A substantial number of respondents were either already pursuing additional education or planned to do so within the next year. Despite recent completion of a career program, one in three respondents were currently enrolled in classes and, of those, 55% were attending JCCC. Nearly 55% of survey respondents planned to enroll again within the next year and, of those, 52% planned to return to JCCC.

Employer Perceptions

* The vast majority of employers were satisfied with the preparation of the career program completer in their employ. Nine out of ten rated the overall job preparation as excellent or good, and less than 5% of employers rated any aspect of their employee's job preparation as poor.

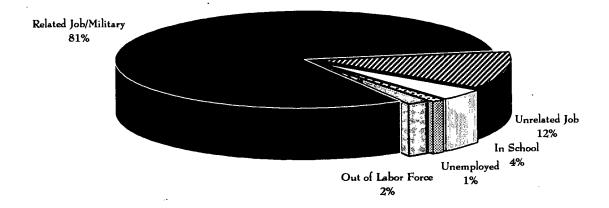

CURRENT STATUS

What percent of career program completers are working in a job related to their course of study, and what are the other completers doing?

One of the primary purposes of conducting annual follow-up studies of career program completers is to determine how they utilize the skills developed through their course of study. Figure 1 depicts the current status of respondents to this year's follow-up study.

Table 2 in Appendix A details results and comparisons of findings over the years. The percent of completers who were employed in a related job has remained essentially the same since 1992, and the percent of unemployed respondents has remained under 3% since 1993. Note that nearly 81% of the Class of 2000 were working in a job related to their course of study or serving in the military, and less than 2% were unemployed and looking for work.

Figure 1
Current Status

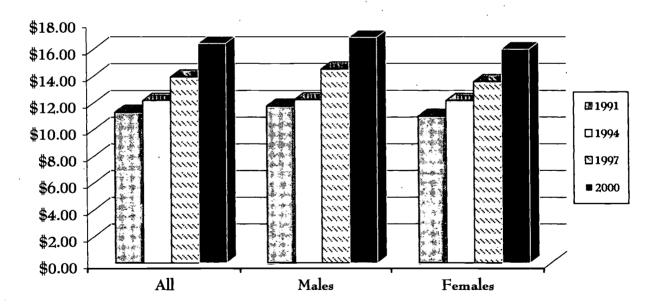

How much money does the average career program completer who is employed full-time in a related job earn?

The hourly wage data collected in the follow-up studies of career program completers is required for state and federal reporting, and is also an important component of the periodic employment, salary, and placement data provided by the college to assist students in making informed career choices.

As Figure 2 depicts, the average hourly wage reported by respondents employed full-time in a related job has continued to increase year after year, from \$11.28 for the class of 1991, to \$16.43 for the class of 2000. This constitutes a 46% increase in the average wage over the last decade. The average reported wage can differ substantially from one career program to another, and for males compared to females. See Tables 4, 8 and 9 in Appendix A for detailed findings.

Figure 2 Average Hourly Wage

PERCEPTIONS OF CURRENT JOB

How positively do respondents view their current full-time job in a career field related to their course of study?

Another important objective of the annual follow-up study of career program completers is to ascertain respondent perceptions of their current full-time related job. As Figure 3 depicts, respondent perceptions of various aspects are once more very positive, and have exhibited little change over time. Note that respondents' evaluations of their job responsibility, working conditions, and advancement potential have improved somewhat compared to 5 years ago. Tables 10 to 15 in Appendix A provide detailed results of findings by program.

ERIC

In what specific areas do career program completers perceive themselves as having benefited from their community college experiences?

Respondents were asked to indicate how much they agreed that the community college had helped them to accomplish a variety of "typical" goals students have for their college experiences. As Figure 4 depicts, the majority of respondents reported improvement in a variety of cognitive and noncognitive behaviors, and these findings have exhibited little change over time. The majority of respondents to this year's follow-up study reported improvement in all nine variables, with the greatest improvement reported in their self-confidence (77%), tolerance for people and ideas (72%), decision-making skills (72%), time management skills (72%), and knowledge of the arts and sciences (72%). See Table 19 in Appendix A for detailed results.

SATISFACTION WITH THE COMMUNITY COLLEGE

How satisfied were the career program completers with their community college experiences?

An important component of the ongoing assessment of institutional effectiveness conducted by the JCCC Office of Institutional Research relates to former students' satisfaction with a number of aspects of their experiences at the college.

As Figure 5 depicts, the majority of respondents expressed satisfaction with 10 of the 12 facets of typical community college experiences. The relatively low percent of respondents expressing satisfaction with job placement services and the availability of financial aid may at least partially be attributable either to the percent of respondents who had not had occasion to fully utilize these services or the inability of some students to qualify for aid or find jobs. Of note is the fact that over 45% of respondents replying to the question on financial aid and 48% of users evaluating job placement services indicated they were neither satisfied nor dissatisfied, and only 9% and 17%, respectively, indicated dissatisfaction with these services. See Tables 20 to 28 in Appendix A for detailed results of findings.

How many career program completers continue their educational pursuits after leaving the community college?

Completion of an educational program does not necessarily mean the end of educational pursuits, particularly with the ongoing strong emphasis on lifelong learning and maintenance of an educated workforce. As Figure 6 depicts, one in three career program completers responding to the survey were currently enrolled, and 55% planned to enroll again within the next year. Only 25% of respondents indicated no plans to pursue additional education.

Note that 55% of those currently enrolled were attending JCCC, and 52% of those planning to enroll within the next year planned to return to JCCC. See Tables 29 and 30 in Appendix A for detailed results of these findings.

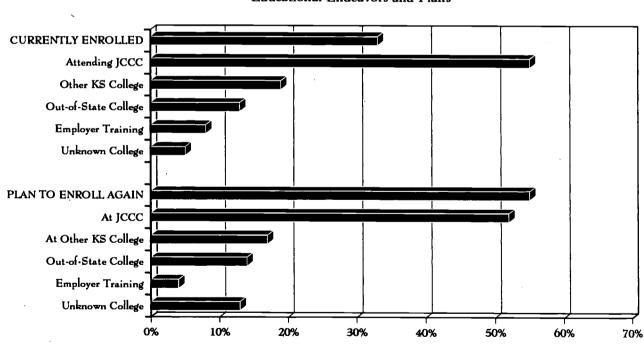

Figure 6
Educational Endeavors and Plans

EMPLOYER PERCEPTIONS

How well do employers feel their employee has been prepared for the workplace?

Each year employers of recent career program completers are asked to evaluate the effectiveness of the preparation their employees received at the community college, and to offer suggestions for enhancing the program to meet the ever-changing technological requirements in most career fields. In this way, JCCC is aided in maintaining up-to-date, high quality programs designed to meet the needs of the workplace.

As Figure 7 depicts, employers have continued to be overwhelmingly positive in their evaluations of all aspects of their employee's preparation. See Tables 32 to 37 in Appendix B for detailed results by career program.

APPENDIX C COMPLETER SURVEY AND COVER LETTERS

JOHNSON COUNTY COMMUNITY COLLEGE SHORT-TERM FOLLOW-UP STUDY OF 1999-2000 CAREER PROGRAM COMPLETERS

Dear Former Student: Please take a few minutes to carefully respond to each of the following questions as honestly and completely as possible, then return the completed survey to us in the envelope provided. Naturally all responses will be kept strictly confidential and reported as group data only.

NOTE: If you did <u>not</u> complete a career program by either graduating, earning a certificate, or leaving with marketable skills during the summer of 1999, fall of 1999 or spring of 2000, please check here and return the uncompleted survey to us so we can correct our records. Thank you for your help.

1.	Which career program did you complete?					
2.	2. Which of the following best describes your current status? (Check	conly one)				
	1. Earned an associate's degree2. Earned a vocational certificate3. Left with enough training to work in this career field					
3.	3. Was JCCC your first choice when you decided to attend college to	pursue this major?				
,	1. Yes 2. No (If no, which college was your first choice?	· · · · · · · · · · · · · · · · · · ·				
4.		nmunity college?				
5.	5. How many total credit hours have you completed at the community	y college?				
6.						
	1. Transfer to another college or university 2. Prepare to enter the job market 3. Improve skills for your present job 4. Explore courses to decide on a new career 5. Remedy or review basic skills	6. Study topics of interest or for self-improvement7. Prepare to change careers8. Other (Please specify)				
7.	educational objective?	8. If yes, did the community college help you to achieve this objective?				
	1. Yes, completely 2. Yes, partially 3. No (If no, briefly explain reason)	1. Yes2. Unsure3. No (Please explain)				
9.	9. Regardless of the financial benefits, do you feel your community college experiences have improved the quality of your life?	10. If you could go back, knowing what you know now, would you still attend the community college?				
	1. Definitely no 2. Probably no 3. Uncertain 4. Probably yes 5. Definitely yes	1. Definitely no 2. Probably no 3. Uncertain 4. Probably yes 5. Definitely yes				

II.	your friends and acquaintances?		12. Would you encourage your children to attend JCCC?				
	1. Yes 2. Unsure 3. No		123.				
13.	Below are several goals that "typical" students have that your experiences at the community college helps	for their colleged you to accor	ge experiences nplish these g	. Please indicoals.	cate how muc	h you agree	
		Strongly <u>Disagree</u>	Disagree	Neutral	Agree	Strongly Agree	
	A. Broadened my knowledge of the arts and sciences	1	2	3	4	5

Dear JCCC Career Program Completer:

As part of Johnson County Community College's continuing commitment to improving its programs and services, we are surveying former students who completed a career program at JCCC (or through Maple Woods or Penn Valley Community College) during summer of 1999, fall of 1999, or spring of 2000. This includes graduates, students earning certificates, and students who have completed sufficient coursework to acquire new skills or upgrade their current ones. We are required by federal and state law to conduct this follow-up study but, in addition, we are most interested in your evaluation of the education you received and how you are using the skills you developed in your career program.

Please take a few minutes to answer each of the questions on the enclosed survey as completely and accurately as possible, then return the completed survey to us in the postage-paid envelope provided by December 10. Naturally your responses will be kept strictly confidential and reported as group data only.

Thank you for your help in evaluating the career program in which you participated, and for any comments or suggestions you may have which will assist us in meeting the needs of future JCCC students.

Sincerely,

Dan Radakovich
Vice President for Academic Affairs

Dear Career Program Completer:

A few weeks ago we sent you a survey requesting information about your perceptions and opinions of the education you received at JCCC (or at Penn Valley or Maple Woods Community College if you participated in a co-op program) and how you are using the skills you developed in your career program. If you have already completed the survey, thank you very much. Your responses will help us in planning to meet the needs of future community college students like yourself.

In the event you have not as yet completed the survey and returned it to us, we are enclosing a second copy. Please take a few minutes to answer each of the questions as completely and accurately as possible. A postage-paid business reply envelope has been provided for your convenience in returning the completed survey to us by <u>December 31</u>. Naturally all responses will be kept strictly confidential and reported as group data only.

Thank you for your help in evaluating the career program in which you participated, and for any comments or suggestions you may have. Every good wish for a joyous holiday season and a most happy, healthy, and prosperous 2001!

Sincerely,

Dan Radakovich
Vice President for Academic Affairs

APPENDIX D EMPLOYER SURVEY AND COVER LETTERS

JOHNSON COUNTY COMMUNITY COLLEGE EMPLOYER EVALUATION OF CAREER PROGRAM COMPLETERS

To:	Re: Former JCCC Studen
To:	Re: Former JCCC Studen

Dear Employer:

We are required by state law to conduct a follow-up study of all completers who initiated their career program at JCCC, and a part of this follow-up study involves collecting data from employers of these former students. Please ask a supervisor familiar with the work of the person referenced above to complete and return this survey in the business reply envelope provided. Naturally all responses will be kept strictly confidential and reported as group data only. Thank you for your help.

1. How would you rate this employee in each of the following areas? (Circle the response which most closely reflects your opinion)

	Very Good	Good	Neutral	Poor	Very Poor
A. Job-related conceptual knowledge	5	4	3	2	1
B. Job- related technical knowledge	. 5	4	3	2	1
C. Attitude toward work (professionalism)	5	4	3	2	1
D. Quality of work	5	4	3	2	1
E. Communications and interpersonal skills	5	4	3	2	1
F. OVERALL JOB PREPARATION	5	4	. 3	2	1

2. What is this employee's current hourly wage?_____

3.	In what areas do you feel employees from this career program are best prepared?
4.	In which areas do you feel additional preparation would be helpful?
5.	Do you have any specific suggestions for improvements in the curriculum or instruction of the career program that trained your employee?
6.	Do you anticipate hiring additional or replacement employees in areas related to this career program in the next 3 to 5 years?
	1. No 2. Yes (If yes, please list the number and types of positions which may become available in this career field)
	Annual Anticipated Job Type and Title Openings Salary
7.	Company name
8.	Your job title:
	Total number of employees:
	Total employees within this division/department:
The	alk you for your accompanion. Plants return the completed assessing the second

Thank you for your cooperation. Please return the completed survey in the envelope provided. Questions or comments about this study may be directed to:

February 12, 2001

Dear Employer:

Each year we are required by state law to conduct follow-up studies to evaluate the effectiveness of the career programs at Johnson County Community College. In our opinion, one of the most important evaluations comes from the employers who hire these former students.

The individual whose name appears on the enclosed survey is a former student of a career program at JCCC (or Penn Valley or Maple Woods Community College through a co-op arrangement) who indicated he/she is now working for you. We would very much appreciate your taking a few minutes to give us your opinions, suggestions, and comments about the preparation this employee received based on your experience with him/her. Please return the completed survey to us in the enclosed postage-paid business reply envelope by <u>February 23</u>. Naturally all responses will be kept strictly confidential and reported as group data only.

If you have any questions or comments about this study, please give us a call at 469-8500, ext. 3443. Thank you for your cooperation.

Sincerely,

Jeffrey A. Seybert, Director Research, Evaluation, and Instructional Development

Enclosures

February 26, 2001

Dear Employer:

A couple of weeks ago we wrote asking you to evaluate a former student who is now working for you. Our records indicate we have not yet received your completed survey.

In addition to being most interested in your evaluation of the former student who is now your employee, we look forward to hearing your views of the community college career program your employee completed. Any suggestions you have to help us improve our programs and services to better meet the needs of future employers of community college career program completers are always most welcome.

If you have already mailed your completed survey, just ignore this reminder. However, in the event the form was misplaced, we are enclosing a second copy together with another preaddressed stamped envelope for your convenience in returning the completed survey to us. We would appreciate receiving it by <u>March 9</u> if at all possible to provide sufficient time to submit the required state report on career program completers. Thank you for your help.

Sincerely,

Jeffrey A. Seybert, Director Research, Evaluation, and Instructional Development

APPENDIX E

COMPARISON OF INITIAL MAIL AND

TELEPHONE RESPONSES

For some time researchers have debated the extent of differences in respondents who return mail surveys in a timely manner and those who do not. One hypothesis is that the more successful completers are those most likely to quickly respond to mail surveys. To test this notion, the JCCC Office of Institutional Research has been analyzing responses to several key questions based on the method of response for years. The following table details comparisons of the respondents who initially returned mail surveys and nonrespondents who were interviewed by telephone because they had not returned a mail survey. As is typical, a greater percent of females and older completers responded to the initial mailings than males or younger completers.

Measurements of success for career program completers were determined to be 1) whether respondents were employed in a job related to their career preparation, 2) how much money they were making in their full-time related job, and 3) how satisfied they were with their full-time related job. Although results for 7 of the 10 years this analysis was conducted indicated a greater percent of initial mail respondents were employed in a related job, overall employment in a related job was essentially the same.

For the majority of the years this comparison has been conducted a somewhat higher average hourly wage has been reported by initial mail respondents employed full-time in a related job, but when earnings were analyzed over the entire 10-year period a difference of only 8 cents was evident. Thus, over time average earnings were essentially the same.

In 9 of the 10 years this comparison has been conducted a greater percent of telephone than initial mail survey respondents were satisfied with their full-time related job, indicating that as a group nonrespondents who had to be telephoned were more satisfied with their full-time related job than were initial mail respondents.

Therefore, assuming employment in a related job, earning a good wage, and being satisfied with that job represent success, it can be concluded (at least for JCCC completers) that the more successful and more satisfied career program completers are <u>not</u> more likely to respond to mail surveys after all.

73

COMPARISON OF INITIAL MAIL RESPONSES WITH TELEPHONE RESPONSES Class of 1999-2000

	Initial Mail Responses (n=221)	Telephone Responses (n=255)
Sex		
Male	28.1%	48.6%
Female	71.9	51.4
Age		
Under 26 years	32.2%	37.2%
26 to 35	24.8	29.4
36 to 50	31.2	28.3
Over 50	5.9	2.7
Unknown	5.9	2.4
2000 average age (mean)	33.4 years	31.1
1999	34.0	32.4
1998	32.2	32.0
1997	34.4	32.8
1996	34.3	32.1
. 1995	33.8	32.5
1994	33.3	31.3
1993	33.3	30.5
1992	33.1	30.5
Method of Completion		
Earned associate's degree	67.4%	45.9%
Earned certificate	29.0	46.3
Left with marketable skills	3.6	7.8
Current Status ¹		
Employed in a related job or military	81.5%	78.4%
Employed in unrelated job	7.7	15.3
Pursuing additional education, not employed	5.4	3.1
Unemployed, looking for work	2.3	0.8
Out of labor force	1.8	2.0
Unknown	1.4	0.4

Note. Percentages reflect responses to specific questions related to current employment status, relatedness of job if employed, and whether respondent was currently pursuing additional education. Unknowns have been excluded. Thus, percentages may differ from those reported elsewhere in this report.

74

HISTORICAL COMPARISON INITIAL MAIL VS. TELEPHONE RESPONSES

·	Initial Mail Responses	Telephone Responses
Employed in Related Job		
2000 percent in related job	81.5%	78.4%
1999	80.0	79.2
1998	77.3	77.1
1997	88.0	82.7
1996	80.1	74.6
1995	78.9	83.2
1994	78.1	83.9
1993	85.2	80.8
1992	75.2	83.1
1991	78.2	73.0
Hourly Wage ¹		
2000 average hourly wage	\$16.14	\$16.24
1999	15.66	15.58
1998	14.91	14.32
1997	13.13	13.91
1996	13.72	13.38
1995	12.63	12.45
1994	12.55	11.95
1993	11.87	11.86
1992	11.42	11.50
1991	11.07	11.06
Job Satisfaction ²		
2000 percent satisfied	75.2%	79.9%
1999	74.2	88.5
1998	81.9	87.4
1997	75.3	84.1
1996	75.5	90.9
1995	59.0	76.5
1994	83.3	83.1
1993	79.5	91.1
1992	64.3	77.1
1991	75.3	93.6

Note. Hourly wage is for respondents employed full-time in a related job. Results detail responses to this question only, excluding unknowns.

² Data were collected utilizing a 5-point scale ranging from very satisfied to very dissatisfied. Thus, the "satisfied" data include "very satisfied" and "somewhat satisfied" responses combined, and the "dissatisfied" data include "somewhat dissatisfied" and "very dissatisfied" responses combined. Unknowns have been excluded. Computed for respondents employed in a full-time related job only.
